LE FONDS EUROPEEN DE DEVELOPPEMENT REGIONAL  
ET LA WALLONIE INVESTISSENT DANS VOTRE AVENIR.

The Département Santé / Health Department (**CER Groupe**) is specialised in the field of immunology: RIA, ELISA, biosensor, flow cytometry among others for the detection of residues, contaminants,... This department is able to produce in large amounts of polyclonal antibodies. Furthermore, CER Groupe has been or is still involved in several European projects for which they generate and characterise antibodies for other partners.

The Technological Resources Centre in Chemistry (**Certech**) offers services in the fields of the environment, materials and process intensification. Certech makes its chemical expertise serve sustainability and offers a personalised guidance to companies for their custom analysis, improvement of products and processes, research contracts... Customers of the centre also benefit from its network: its participation in European research programs, standardisation committees and the organisation of thematic conferences allows Certech to increase its partnership.

Do you need a **specific antibody** ?

Are you looking for **the synthesis** of a specific molecule ?

CER Groupe and Certech combine their expertise to create an advice service in immunochemistry

- Design and synthesis of specific haptens
- Synthesis of immunogens
- Production and characterisation of polyclonal antibodies
- Development of small libraries of molecules
- Synthesis of specific organic molecules
- Production of gels for immunoaffinity chromatography
- Supply of bibliographic studies on the state of the art, including publications and patents

Our team of highly qualified and experienced scientists can support you in multiple fields: do not hesitate to contact us.

For more information in the following fields of chemistry:

- **Organic chemistry**
- **Innovative reaction media**
- **Catalysis**
- **Molecular structural characterisation**
